

Valentin EREMIA

Frontend Developer

ABOUT ME

I have a strong curiosity and passion for always looking for new challenges to improve myself both personally and professionally.

I'm really good at organizing things and I plan every aspect of my projects carefully. When I come across an opportunity,

I always approach it with enthusiasm to learn and grow my skills. I truly believe that mistakes are valuable chances for growth and progress. Instead of getting discouraged by them, they motivate me to achieve even greater successes and improve myself.

EXPERIENCE

FREELANCER (2022 - Present)

Since January 2022, I've been a freelance web and mobile frontend developer. I enjoy building applications using various technologies. Effective communication requires a professional tone, clear language, and a formal style. A professional tone enhances clarity, credibility, and professionalism for impactful communication.

CAR ELECTRICIAN (2013 - 2022) | Autosoft AGC SRL

I worked as an automotive electrician and car painter, handling tasks such as straightening bodywork, panel cutting, replacing damaged parts, welding, sanding, and finishing for painting. I also occasionally performed mechanical work.

INSURANCE AGENT (2007 - 2008) | ING

I work in this company with the best responsibility in the right area, delivering the best business results. I was responsible for looking for customers for life and health insurance.
